THE CHALLENGE

Since it was first established, the Supply Chain has been an ever changing and evolving landscape. When we look back over the history of Supply Chain Management, there are so many events and developments which have shaped the industry to the modern power house it is today.

For many Supply Chain professionals the biggest challenge today is to understand the new "lingo" and the latest "buzzwords" that seem to be taking the Supply Chain by storm. In recent times, the change in customer demand and buying patterns have caused a ripple effect across the Industry, with every corner of the Supply Chain being revolutionised by advances in technology.

THE SOLUTION

Keeping up with the newest trends can seem like a full time job. For Professionals who already have busy work schedules, finding time to understand these key changes can be a daunting task. Don't worry, IoSCM are on hand to teach you all you need to know about the modern Supply Chain.
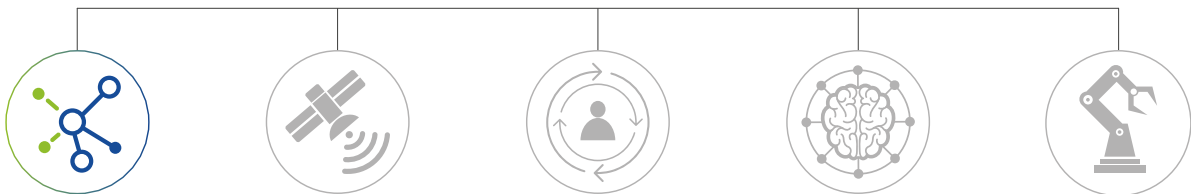

We are therefore delighted to introduce **INTELLIGENCE 4.0.** A comprehensive collection of brand new online short courses providing expert insight into the latest major developments from across the industry.

Each course has been written by an Industry Expert, using their in-depth understanding and practical knowledge to teach you everything you need to know about the newest and largest developments within the Supply Chain.
